

CatatCuan - Project Charter

Project ID: PRJ-20260120-001 Version: 1.0 Date Created: 2026-01-20 Status: APPROVED Phase: 01 (MVP)

Project Information

Field	Value
Project Name	CatatCuan - Asisten Keuangan Digital Toko Kelontong
Project ID	PRJ-20260120-001
Phase	01 - MVP (Minimum Viable Product)
Context	Tier 1 - Solo Developer
Project Manager	Fachri
Sponsor	Self-funded
Start Date	20 Januari 2026
Target End Date	15 Maret 2026 (8 weeks)
Methodology	Kanban (flexible, no ceremony)

Purpose & Justification

Business Need

Pemilik Toko Kelontong Tradisional di Indonesia mengalami masalah "**Bocor Alus**" – modal usaha tergerus untuk keperluan pribadi tanpa tercatat, menyebabkan:

- Ketidaktahuan profit harian yang akurat
- Modal tidak berkembang ("toko nggak maju-maju")
- Catatan berantakan (campur belanja, hutang, pribadi)

Market Opportunity

- **65-70 juta UMKM** di Indonesia
- **25+ juta** sudah digital (WhatsApp user)
- Aplikasi kasir existing terlalu rumit untuk warung tradisional
- Gap: Belum ada yang fokus **hanya** ke arus kas sederhana

Strategic Alignment

- Membantu digitalisasi UMKM Indonesia
- Memberikan solusi "bridge" antara buku kas manual dan sistem digital
- Target ujikom dengan menunjukkan kemampuan full-stack development

SMART Objectives

#	Objective	Metric	Target	Deadline	SMART Check
1	Launch MVP di Play Store	App published	1 app live	15 Mar 2026	S,M,A,R,T
2	Acquire initial users	Downloads	50 downloads	31 Mar 2026	S,M,A,R,T

3	Validate product-market fit Objective	User retention Metric	30% DAU/MAU Target	30 Apr 2026 Deadline	<input checked="" type="checkbox"/> S.M.A.R.T SMART Check
4	Demonstrate full-stack capability	Components built	Mobile + Admin + Backend	15 Mar 2026	<input type="checkbox"/> S,M,A,R,T

Success Criteria

- Mobile app functional with core features (Catat, Dashboard, Laporan)
- Admin dashboard operational with user management
- Data sync working between mobile and cloud
- At least 3 beta testers provide positive feedback
- Zero critical bugs at launch

☒ Scope

☒ In Scope (Phase 01 - MVP)

#	Feature	Platform	Priority
1	User Registration & Login	Both	<input checked="" type="checkbox"/> Must Have
2	Catat Transaksi (Masuk/Keluar/Ambil Pribadi)	Mobile	<input checked="" type="checkbox"/> Must Have
3	Dashboard "Untung Hari Ini" + Bocor Alus Tracker	Mobile	<input checked="" type="checkbox"/> Must Have
4	Laporan Harian/Mingguan/Bulanan	Mobile	<input checked="" type="checkbox"/> Must Have
5	Export ke Excel	Mobile	<input type="checkbox"/> Should Have
6	Offline Mode + Auto Sync	Mobile	<input checked="" type="checkbox"/> Must Have
7	Admin: User Management	Web	<input checked="" type="checkbox"/> Must Have
8	Admin: Maintenance Mode Toggle	Web	<input checked="" type="checkbox"/> Must Have

☒ Out of Scope (Phase 01)

#	Feature	Reason	Phase
1	Fitur Hutang	Nice-to-have, complexity	Phase 1.5
2	Backup/Restore Manual	Auto-sync sufficient for MVP	Phase 1.5
3	Admin Analytics Dashboard	Not critical for launch	Phase 1.5
4	Admin Broadcast Message	Can use manual notification	Phase 1.5
5	Stock Watchlist (5-10 items)	Simple tracking for new/existing warung	Phase 1.5
6	Reminder/Notification	Depends on user behavior data	Phase 2
7	Multi-language Support	Focus on Indonesian first	Phase 2
8	iOS Version	Focus on Android first (target market)	Phase 2
9	Payment/Subscription Integration	Free for MVP	Phase 2

#	10 Full Inventory Management Feature	Complex, full feature for power users	Phase 2 Phase
---	--------------------------------------	---------------------------------------	---------------

Stakeholders

Stakeholder	Role	Interest	Influence	Communication
Fachri	Developer, PM, Owner	High	High	Daily self-review
Target Users	Pemilik Warung	High	Medium	Beta testing, WhatsApp
Interviewee (Ibu-ibu)	Beta Tester	High	Medium	WhatsApp feedback
Pengujii Ujikom	Evaluator	Medium	High	Final presentation

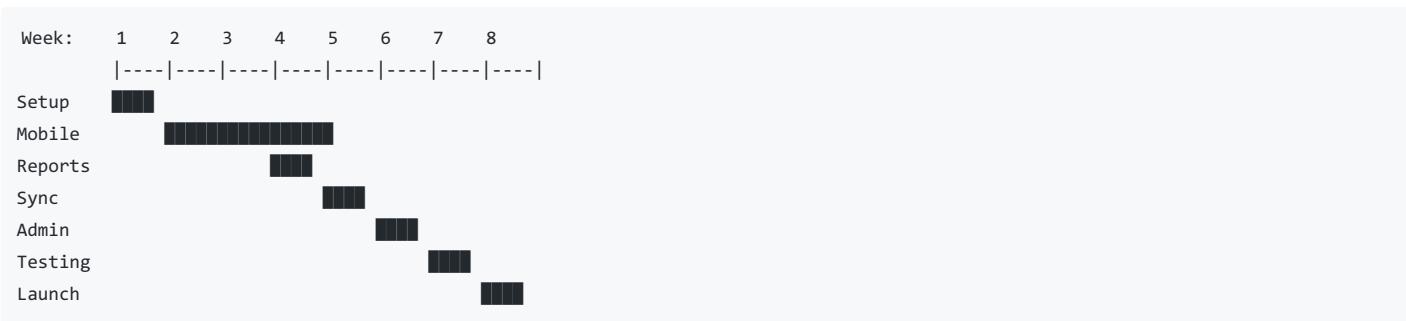

Tech Stack

Layer	Technology	Version
Mobile	Flutter + Drift + PowerSync	3.24+
Backend	Supabase (PostgreSQL + Auth)	Latest
Admin Dashboard	Next.js + Tailwind + shadcn/ui	14.x
Hosting (Admin)	Vercel	Free tier
State Management	Riverpod	2.5+
Sync	PowerSync	Latest

Timeline & Milestones

Phase	Milestone	Target Date	Duration	Owner	Deliverable
Week 1	Project Setup	27 Jan 2026	1 week	Fachri	Flutter + Supabase + Next.js scaffold
Week 2-3	Core Mobile Features	10 Feb 2026	2 weeks	Fachri	Transaction CRUD, Dashboard
Week 4	Reports & Export	17 Feb 2026	1 week	Fachri	Daily/Weekly/Monthly reports, Excel
Week 5	Sync & Offline	24 Feb 2026	1 week	Fachri	PowerSync integration
Week 6	Admin Dashboard	03 Mar 2026	1 week	Fachri	User management, maintenance mode
Week 7	Testing & Polish	10 Mar 2026	1 week	Fachri	Bug fixes, UI polish, beta test
Week 8	Launch Prep	15 Mar 2026	1 week	Fachri	Play Store submission, docs

Gantt Overview

⚠ Budget

Cost Breakdown

Category	Item	One-time	Monthly	Notes
Development	Self	Rp 0	-	Solo developer
Infrastructure	Play Store	Rp 400.000	-	One-time registration
Infrastructure	Domain	Rp 150.000	-	catacuan.id (optional)
Infrastructure	Supabase	Rp 0	Rp 0	Free tier sufficient
Infrastructure	Vercel	Rp 0	Rp 0	Free tier sufficient
Testing	Beta Testers	Rp 100.000	-	Small thank-you gifts
Miscellaneous	Contingency	Rp 150.000	-	20% buffer
TOTAL		Rp 800.000	Rp 0	

ROI Projection (Year 1)

Metric	Conservative	Optimistic
Users (Year 1)	500	2,000
Conversion to Paid	5%	10%
Paying Users	25	200
ARPU	Rp 35.000	Rp 50.000
Annual Revenue	Rp 10.500.000	Rp 120.000.000
ROI	+1,212%	+14,900%

⚠ Key Risks & Mitigations

#	Risk	Likelihood	Impact	Mitigation	Owner
1	Scope creep – Adding features mid-sprint	High	High	Strict Out of Scope list, Phase 2 bucket	Fachri
2	PowerSync complexity – Learning curve	Medium	Medium	Follow official tutorials, allocate extra time	Fachri
3	Low-end device performance – App laggy	Medium	High	Lightweight UI, optimize SQLite queries	Fachri

#	Risk	Time constraint – Part-time development	Likelihood	Impact	Mitigation	Owner
4			Medium	Medium	30% buffer in timeline, prioritize ruthlessly	Fachri
5	User adoption	– Target users not tech-savvy	Medium	Medium	Extreme simplicity, onboarding tutorial	Fachri

☒ Assumptions

1. Target users (pemilik warung) have Android smartphones with WhatsApp capability
2. Internet connection available at least occasionally for sync
3. Users willing to spend 20-50k/month for useful tool
4. Solo development is sustainable for 8-week MVP timeline
5. Supabase free tier sufficient for first 500 users

☒ Dependencies

Dependency	Type	Status	Impact if Delayed
Flutter SDK	External	☒ Available	Cannot start mobile dev
Supabase Account	External	☒ Available	Cannot setup backend
PowerSync SDK	External	☒ Available	Cannot implement sync
Google Play Console	External	☒ Need setup	Cannot publish app
Vercel Account	External	☒ Available	Cannot deploy admin

☒ Approval

Role	Name	Date	Signature
Project Sponsor	Self	2026-01-20	☒ Approved
Project Manager	Fachri	2026-01-20	☒ Approved
